UniConnect: User Stories and Acceptance Criteria:

User Story 1

As a Student, I want to register for my courses online, so that avoid long queues and registration errors.

INVEST: The user story is Independent, Negotiable, Valuable, Estimable, Small, Testable.

Acceptance Criteria:

- **Given** I have paid my fees and meet prerequisites,
When I submit course registration,
Then my registration is confirmed.
- **Given** I do not meet registration requirements,
When I attempt to register,
Then the system explains why registration failed.

User Story 2

As a Student, I want to receive official announcements instantly, so that stay informed about timetable and academic changes.

INVEST: The user story is Independent, Negotiable, Valuable, Estimable, Small, Testable.

Acceptance Criteria:

- **Given** a new announcement is published,
When I log in,
Then I see the announcement.
- **Given** I open an announcement,
When I read it,
Then it is marked as read.

User Story 3

As a Student, I want to view my fee balance, payment history and receipts, so that track my financial records.

INVEST: The user story is Independent, Negotiable, Valuable, Estimable, Small, Testable.

Acceptance Criteria:

- **Given** payment is confirmed,
When processing finishes,
Then an official receipt is generated automatically.
- **Given** I open the Finance page,
When logged in,
Then I can view fee balance and payment history.

User Story 4

As a Lecturer, I want to upload course materials in one place, so that students can easily access them.

INVEST: The user story is Independent, Negotiable, Valuable, Estimable, Small, Testable.

Acceptance Criteria:

- **Given** I am logged in as a lecturer,
When I upload materials,
Then enrolled students can access them.

- **Given** an upload completes,
When I refresh the page,
Then the file appears.

User Story 5

As a Registry Officer, I want to automatically verify fees, prerequisites and course availability before registration, so that prevent invalid registrations.

INVEST: The user story is Independent, Negotiable, Valuable, Estimable, Small, Testable.

Acceptance Criteria:

- **Given** a student starts registration,
When checks are performed,
Then registration proceeds only if all checks pass.
- **Given** one check fails,
When registration is submitted,
Then the system rejects it and explains why.

User Story 6

As a Registry Officer, I want to send official announcements through the portal, so that students receive important information quickly.

INVEST: The user story is Independent, Negotiable, Valuable, Estimable, Small, Testable.

Acceptance Criteria:

- **Given** I publish an announcement,
When it is sent,
Then all intended students receive it.
- **Given** students receive the announcement,
When they read it,
Then the system records delivery/read status.

User Story 7

As a IT Director, I want to implement role-based access control, so that keep confidential student information secure.

INVEST: The user story is Independent, Negotiable, Valuable, Estimable, Small, Testable.

Acceptance Criteria:

- **Given** a student logs in,
When viewing records,
Then only their own records are visible.
- **Given** an unauthorized user requests data,
When access is attempted,
Then access is denied.

User Story 8

As a Student, I want to view approved results and GPA, so that monitor academic progress.

INVEST: The user story is Independent, Negotiable, Valuable, Estimable, Small, Testable.

Acceptance Criteria:

- **Given** results are officially approved,
When I open Results,
Then I can view grades and GPA.
- **Given** results are not approved,
When I try to view them,
Then the system indicates they are unavailable.
